

VINTEC

WWW.VINTEC.HK

濕度 HUMIDITY

High humidity will cause molds whereas low humidity will cause corks to dry out. Vintec wine cellars are equipped with a system that recycles water from condensation, ensuring ideal humidity conditions for your wine.

濕度太高會造成發霉，過低則會令酒塞變乾。Vintec酒櫃配備之濕度調節系統可將凝結水份循環再用，確保為佳釀提供理想之濕度。

溫度 TEMPERATURE

All wines mature at the same temperature, which is a constant temperature set between 12°C to 14°C. Vintec presents a wide range of wine cellars offering single, dual and multi-temperature models to meet your cellaring needs.

長期儲存酒釀作陳年的最佳儲存溫度是攝氏十二至十四度。全線Vintec備有多種款式酒櫃，包括單、雙及多重恆溫選擇，滿足您的存酒需要。

防紫外線 UV PROTECTION

Light and UV rays rapidly destroy your wines by oxidising the tannins. Vintec wine cellars safeguard your fine wines from harmful light and UV rays with solid plain door or anti-UV treated glass door options.

Vintec酒櫃備有實門及防紫外線玻璃門選擇，確保您的佳釀免受光線/紫外線照射，防止酒中的單寧酸成份受氧化而破壞酒質。

防震 VIBRATION-FREE

Slow, balanced-cycle compressors and wooden shelves are equipped in the Vintec wine cellars, to reduce vibration to the minimum.

Vintec酒櫃採用低速平衡壓縮機和穩固木架，有效提供全面的防震功能。

天然通風 NATURAL VENTILATION

In order to prevent mould growth, which would generate bad odour and risk deteriorating the corks, Vintec provides a natural permanent ventilation, introducing renewed air from the ambience into the cellar through an "air circulation" effect.

Vintec酒櫃具有天然通風功能，其通風設計確保新鮮空氣能經通風口流進酒櫃，使櫃內空氣流通，以防止霉菌滋生、異味產生、甚至瓶塞腐壞等問題。

THE QUALITY OF THE MATERIALS, THE INNOVATIVE TECHNOLOGY AND THE CONTEMPORARY DESIGN MAKE VINTEC WINE CELLARS THE IDEAL SOLUTION FOR SAFEGUARDING YOUR PRECIOUS COLLECTION.

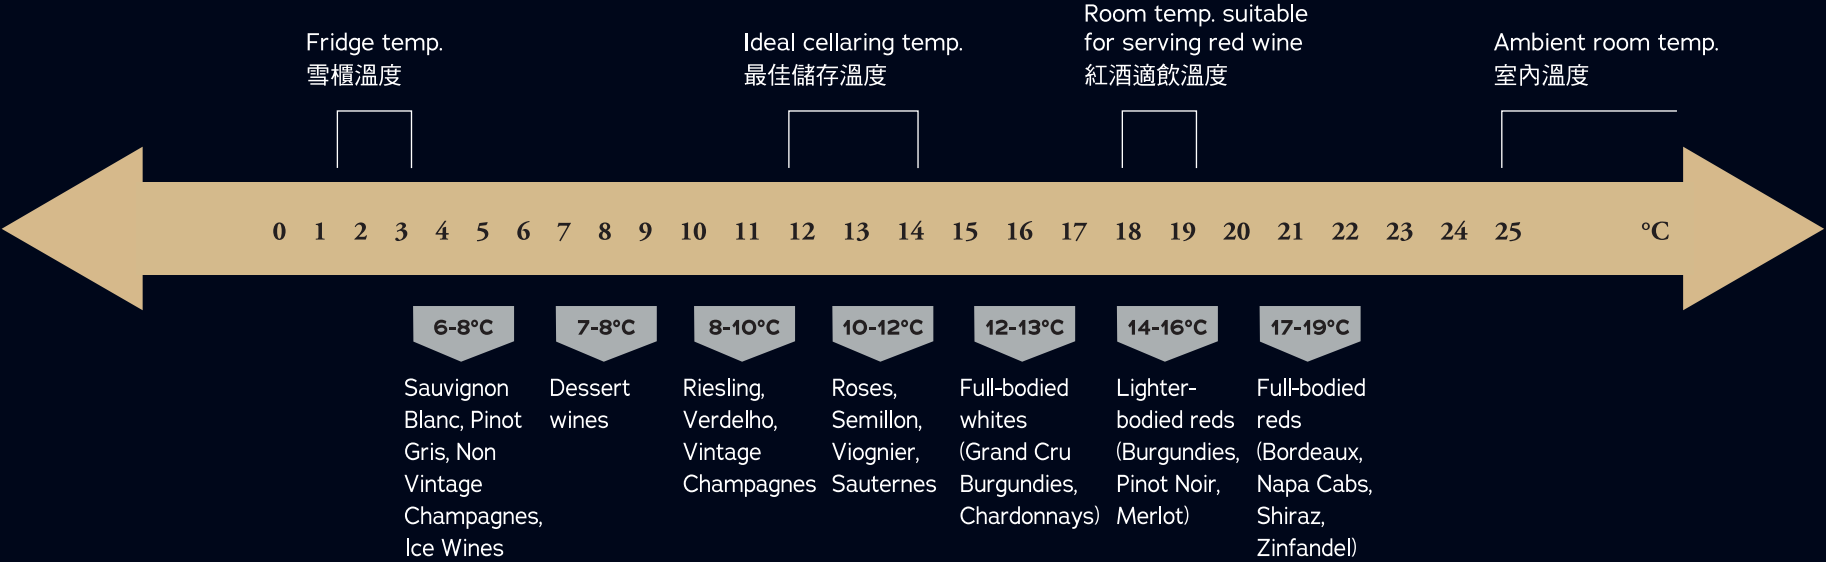

時尚設計的VINTEC酒櫃以創新科技和優質物料為您的佳釀提供完美的恆溫儲存環境。

"I am totally delighted with my Vintec wine cabinet; it combines elegance and functionality of the highest order. Because it is surprisingly light, notwithstanding its size, it is easy to move should the need arise, and installing it is little more than plugging it into a conventional power outlet. The ability to have wines stored at two temperatures is extraordinary, allowing you to keep red wines at optimum temperatures for service throughout the summer, and - of course - white wines at a much lower temperature."

JAMES HALLIDAY

- Australian wine writer, critic & panelist

Condensation on glass door is a natural phenomenon, especially when there is high humidity or vast temperature difference.

當濕度高或溫差太大時，玻璃門上會出現水珠或霧氣，此乃正常現象。

For specific models, condensation will form on the back panel for humidity preservation. Please ensure wine bottles do not touch the back panel of the wine cabinet.

個別型號酒櫃背板會有水滴形成以保持櫃內濕度。存放葡萄酒時，避免酒瓶接觸到背板，以免沾濕標籤。
